

# Circular transparent lenses

For sight glasses

Model 006

For visual checking of fluids in all types of vessel, including those under pressure, in special thermal and chemical conditions.  
Also for checking processes.

The quality of the sight glass satisfies the most demanding safety standards and industry guarantees in general.

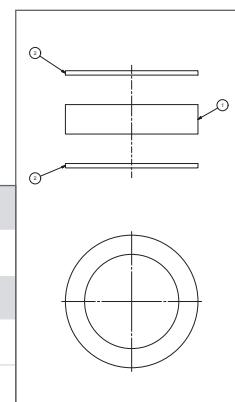

## Specifications

- Boron silicate glass of high chemical stability.
- Of great purity and homogeneity.
- Low thermal expansion coefficient.
- Thermally prestressed which guarantees high mechanical resistance.
- High resistance to sharp changes of temperature, pressure and chemical aggression, guaranteeing a long life.
- Joint surfaces are perfectly flat.
- If the glass is accidentally broken it does not shatter.
- Satisfies the international standards: DIN-7080, Ö Norm M7353, etc.

## IMPORTANT

Depending on demand:

- Other types of joints: Cardboard type klingerit acidit, PTFE (Teflón), etc.
